3D DIAGNOSTIC AND IMPLANT PLANNING TOOL
Carestream Dental’s 3D imaging software is included at no charge with each of our CBCT products and allows you to install it on as many PCs as you wish.

- Is feature-rich and intuitive
- Includes implant planning software and comprehensive implant library with more than 60 manufacturers
- Includes axial, coronal, sagittal, 3D, cross-sections, reconstructed panoramic and oblique views
- Allows images to be saved to DVD or USB drive

EASE OF COLLABORATION
Carestream Dental’s CS 3D Imaging software is available free for you to share with your referring doctors. With our CBCT systems, you can:

- Enhance collaboration with CS 3D Imaging Software Viewing Module; view and manipulate data
- Share scans via USB or CD
- Facilitate better patient experience and improved outcomes

INTEGRATED IMAGING SOFTWARE
CS OMS Imaging software seamlessly integrates with our WinOMS software and Carestream Dental’s digital imaging systems.

- Instantly access patients’ images directly from their chart
- Analyze, manipulate, annotate and highlight areas of interest, while maintaining accurate diagnostic records
- Easily share images for streamlined referral interaction and faster claims reimbursement
- Create powerful patient, internal or marketing communications with integrated images and word processing tools
- Take advantage of simple and intuitive cephalometric tracing
- Simulate implant placement using panoramic X-ray images

THE CARESTREAM DENTAL ORAL SURGERY STORY

WHAT MAKES US DIFFERENT

Helping oral surgery practices succeed through the use of technology is Carestream Dental’s primary goal. It started thirty years ago with a software program called MicroDesign, which was built on the finest technology of the time.

This game-changing product laid the foundation for stability and reliability that continues to this day. Each new version builds on the valuable and insightful input of dental industry professionals and the Carestream Dental Quality Assurance Program. The result: seamless integration of systems and technology, which enables oral surgery practices to deliver diagnostic excellence and positive patient outcomes.

IT’S ALL IN THE CARESTREAM DENTAL DESIGN

All components of the Carestream Dental product portfolio work together, and our practice management software interfaces seamlessly with our imaging systems and software. There’s no need to create a bridge from one component to another—you simply enjoy streamlined workflows that take productivity and functionality to a whole new level. No other company can make this claim.

If an issue does arise, there’s no guesswork about who to contact for resolution. One company, one source for answers: Carestream Dental.

CS WINOMS PRACTICE MANAGEMENT SOFTWARE

Whether you are looking for billing and scheduling or a more comprehensive chartless solution, WinOMS is the answer.

Standard features:
- Insurance processing and tracking
- Referral tracking, referral letters, referral analysis
- Financial reporting and analysis
- Implant, stage and recall tracking
- Day sheet and night call list
- Comprehensive ADA, CPT and ICD-10 cross-coding
- Prescription writing
- State-of-the-art client server database technology
- Patient dock, which allows you to: put patients on hold, open up new windows and multi-task effortlessly; push patient records from one user to another (similar to email)

EMR-ELITE

Our digital consent forms module includes multiple OMSNIC-approved consent forms, eliminating the need for paper-based consents.

EMR Elite is comprised of three modules:
- Anesthesia Record:
  - Enables you to monitor the patient while under anesthesia
  - Connects with Mortara, Casmed/Zoey and Criticare devices
  - Also enables you to track drugs used during the surgery
- Point-of-Care:
  - Eliminates the need for a paper routing slip by communicating all procedures, prescriptions, follow-ups, financial information to your team member handling check-out
- EMR Consents and Notes:
  - Eliminates printing and scanning of consents forms by having your patients sign OMSNIC-supplied consent forms digitally using a tablet or signature pad
  - EMR Notes provides you with the ability to use templates for completing consultation and surgical notes
  - Over 50 OMS-specific templates come preloaded, and enable you to complete an op note in a matter of minutes
  - Notes can be customized to each provider in your practice

Now you can share a patient’s entire chart across multiple offices easily and seamlessly.

Create and save record of patient vital signs and drugs used with Anesthesia Record.

Point of Care Module allows you to view all patient information and x-rays in one convenient place.
Seamlessly integrated with your WinOMS software, powerful eServices simplify and automate formerly time-consuming, but essential, administrative tasks.

**Automated Statements**
- Create professional-looking statements with the click of the mouse
- Choose standard or custom messaging
- Eliminate spending on stamps, envelopes and forms

**eClaims**
- Submit electronic claims quickly and easily
- Electronically attach supporting documents
- Automatically send paper claims to payers as needed*

**ePayments**
- Process payments faster
- Eliminate the need to re-enter account information

**eVerifications**
- Check patient insurance eligibility online
- Expedite verification

*Requires use of NEA FastAttach

**eConnections**
- Email appointment reminders to patients and track results
- Tie everything back to patients and revenue
- Monitor online reviews from around the web and save time

**eBackup**
- Benefit from reliable data recovery services
- Safely transfer and store valuable practice management and image data
- Easily access backups, if needed

**ePrescriptions**
- Automatically transmit patient prescriptions
- Access comprehensive nationwide list of pharmacies
- Find pharmacies not online via intelligent routing

*Carestream Dental 3D images are available the next day. Radiological images displayed on digital handheld devices are not intended for diagnostic use.

Now, instead of writing out a paper prescription, you can send the information electronically to your patient’s preferred pharmacy.

**CS WINOMS CLOUD**

CS WinOMS Cloud: everywhere you want it

WinOMS Cloud is a powerful practice management and imaging solution designed for practices that want to avoid making difficult and costly decisions about servers and computer hardware upgrades. It offers a centralized platform you can access from almost any web-enabled device.

**Focus on your patients, less on your software**

Designed to fit seamlessly in your practice, you can now harness the power of WinOMS without the complexity of maintaining an IT infrastructure.

**Data security made simple**

WinOMS Cloud includes secure, offsite, and HIPAA-compliant storage for all your sensitive patient and practice management data. Your data will be backed up and protected by Carestream Dental.

An imaging solution that’s extraordinary

You can benefit from the features and imaging capabilities of Carestream Dental’s OMS Imaging software—all within the cloud. Thanks to real-time synchronization, periapicals are immediately available when they are uploaded into the patient’s chart. Larger 2D and 3D images are viewable the next day. That means you’ll be able to pull up Carestream Dental’s CBCT images from almost any device—anywhere, anytime.*

**Access: wherever and whenever you want it**

Ideal for multi-office practices, WinOMS Cloud lets you access your patient information in real time from any of your office locations. Imagine the possibility of accessing all of your data, applications, periapicals, and larger 2D and 3D images whenever you need to 24/7 at any web-connected location! The cloud enables you to effortlessly accommodate those patients who like to make appointments at more than one office.

**The latest technology made affordable**

WinOMS Cloud significantly cuts the cost of using sophisticated practice management software by removing the need to purchase, install and maintain a separate practice management server. Relish financial predictability with monthly subscription fees and the ability to simply add workstations—no need to purchase additional software! Plus, you’ll enjoy the benefits of always being on the most current version of the software.

WinOMS offers many optional modules to further enhance your practice’s productivity. Pick the combination that best serves your needs. Some of the available options include:

**Third-Party Software**

WinOMS software is also compatible with many third-party programs, further streamlining practice processes and increasing productivity.

**CareCredit**
- The leading patient financing option
- Fully integrated with WinOMS
- Flexible payment options for patients

**NEA FastAttach**
- Send supporting documents quickly to dental insurance companies when filing eClaims
- Settle electronic claims with attachments in weeks instead of months

**OMS3 Practice Pilot**
- Designed to demonstrate key data points specific to the success of your practice in a visual manner within your WinOMS software
- Fast and simple data filtering by office, provider, patient age and patient zip code
- Personal guidance that help you understand what the data is telling you
- Data visualization tools that extract WinOMS data and deliver comprehensive charts and analysis

**PBHS iConsult**
- Facilitates chairside treatment, planning and case acceptance
- Automatically syncs entire consultation—including images, documents and audio files—with WinOMS

**Amazing Charts EHR****
- Is the top-ranked, all-in-one EHR (electronic health record) solution, certified for meaningful use
- Completely document any patient encounter

**Lexicomp® Online™ for Dentistry**
- Integrates pharmacology information and drug interaction screening directly into WinOMS
- Creates and stores patient medication history quickly

**OMSNIC**
- Leading provider of professional liability insurance and risk management education for oral and maxillofacial surgeons
- Integrated with WinOMS
- The standard of excellence in nationwide OMS professional liability insurance
- The only insurance program for OMS endorsed by AAOMS

**Additional Modules**

- **Mobile Practice Management**
  - Put your practice in the palm of your hand, using your smartphone to access your WinOMS files remotely. The PEARL Module lets you view patient records, financial information, reports and images**. PEARL is not available on the Cloud.

- **QuickBooks Integration**
  - Spending too much time writing refund checks and transferring balances? Let us reduce that workload by 85% with QuickBooks Integration for WinOMS.

- **Online Patient Registration**
  - Reduce your staff’s data entry time by allowing your patients to enter their demographics, insurance information, referral and health history through your website***.

*Additional fees may apply.

**Radiological images displayed on digital handheld devices are not intended for diagnostic use.

***Requires use of PBHS iConsult.

****Amazing Charts is not available on WinOMS Cloud.
